Art of Problem Solving

Finding the optimal cost of doing so is the actual problem we are solving here. I'm doing that later using the min cost matching, others are doing it using the mincost maxflow. In the part of my solution you are quoting I'm just computing the cost of one special case: the one where each party is served by a different team.

ACM ICPC World Finals 2019

You can find some of them at Codeforces (which allows virtual participation also). You can find all (or almost all) of the problems at ACM-ICPC Live Archive - Home For solutions you probably will need to search the local website for the specific regional. You can see a post about this on Codeforces:

Where can I find past ACM ICPC regionals and finals ...

ACM ICPC World Finals 2015 Solution sketches Disclaimer This is an unofficial analysis of some possible ways to solve the problems of the ACM ICPC World Finals 2015. They are not intended to give a complete solution, but rather to outline some approach that can be used to solve the problem. If some of the terminology or algorithms mentioned

ACM ICPC World Finals 2015

As in the ACM contests, our contestants have five hours in which to write working solutions (in C, C++, or Java) to about eight programming problems. We score by the number of correct solutions, breaking ties on the basis of the total time required to complete the

The Annual Berkeley Programming Contest

It turned out that caches were relatively easy to analyze, although good solutions for Non-LRU caches had yet to be found. Much later, between 2008-2011, Daniel Grund developed an efficient analysis for FIFO caches and approached a solution for the analysis problem for PLRU caches. 9,10,11
