## **Evaluating Research In Academic Journal**

Knowing the potential components of an academic journal will help you to determine which articles are research articles, and which are not, despite appearing in an academic journal. Note:even within a peer-reviewed publication, not all of these components are necessarily subject to the peer-review process. You will need to read a specific publication's editorial policies to determine whether their letters to the editor, book reviews, and news briefs are peer-reviewed prior to publication, or ...

Searching for information can be overwhelming. Part of what makes research challenging is that not all information is reliable or high in quality. When evaluating information, a researcher should consider the Currency, Relevance, Authority, Accuracy, and Purpose of each source he or she encounters.
