Geometry from a Differentiable Viewpoint The development of geometry from Euclid to Euler to Lobachevski`i, Bolyai, Gauss, and Riemann is a story that is often broken into parts - axiomatic geome- try, non-Euclidean geometry, and differential geometry. This poses a problem for undergraduates: Which part is geometry?

The divide between undergraduate differential geometry and graduate geometry is too great. A beginning graduate student could walk into a course on differentiable manifolds and Riemannian Geometry with no undergraduate diff geometry and be fine (as I did), but it is tough road since much of the intuition and motivation is missing.
