Similarly, the coastal dunes of the Great Lakes are home to unique species and ecological processes found nowhere else. Both of these areas are expanding urban centers for the nation. The resulting elimination and degradation of coastal habitats have created a need for scientifically guided management.

Channel Islands Field Station - USGS

A lagoon is a shallow body of water protected from a larger body of water (usually the ocean) by sandbars, barrier islands, or coral reefs. Lagoons are often called estuaries, sounds, bays, or even lakes. Coastal Lagoons Lagoons sheltered by sandbars or barrier islands are called coastal lagoons. Coastal lagoons form along coastal plains—flat or gently sloping landscapes.
